

Elizabeth Mudge MSc, BSc, DPodM, SRCh, MChS

MSc (Wound Healing and Tissue Repair), BSc (Podiatric Medicine), DPodM (Podiatric Medicine), SRCh (State Registered Chiropodist/Podiatrist), MChS (Member of the Society of Chiropodists/Podiatrists)

Elizabeth has been professionally qualified as a podiatrist since 1984, during which time she predominantly worked as a clinician for the NHS in a variety of specialist areas. In 1996 she took the position of diabetes specialist podiatrist for North Bristol NHS Trust working principally in secondary care as part of a multidisciplinary diabetes team and was involved in a variety of research projects with particular reference to diabetic foot wounds. In her current role as research fellow in the Wound Healing Research Unit she is part of a multidisciplinary research and clinical team, and involved in conducting and project managing a variety of academic and commercial research projects to investigate various aspects of wound healing and to explore provision of effective patient care. She has a particular interest in health psychology and co-ordinates and manages the Cardiff Wound Impact Schedule (CWIS) and teaches on the MSc course in wound healing and tissue repair at Cardiff University.
