

Giorgia Centis

Giorgia Centis is a biomedical engineer working as project manager in EU initiatives. Since 4 years she works in Arsenà.IT, taking part at several EU eHealth projects. She has gained experience in the telemedicine service design and evaluation impact techniques through Health Technology Assessment methodologies.

Arsenà.IT is the voluntary consortium among the 23 Local Health Authorities and Hospital Trusts of the Veneto Region (Italy) and works as the regional research centre on eHealth innovation with the aim to enhance the clinical processes and the assistance offered to citizens by means of a collaboration among associated members, an optimization of involved resources, a reduction of costs and a facilitation of the change management.
