

# DIABETIC FOOT DAY/PIE DIABETICO SYMPOSIUM

EWMA-GNEAUPP 2014

## Objectives

The objective of the Diabetic Foot Day/Pie Diabetico Symposium is through presentations and panel sessions to discuss diagnostic and interventional strategies for diabetic foot ulcers and amputation prevention. The symposium offers the opportunity to review state-of-the-art concepts and techniques within the field of saving the diabetic foot. Furthermore the symposium will highlight the current status in Spain. Spain is a country that has one of the highest rates worldwide of amputations in people with diabetes. Multidisciplinary care by specialized units has proved to be useful in preventing injuries and avoiding major amputation, when the patient has complicated ulcers. However, there are still major challenges in establishing these models in Spain. The symposium will point out the current and future opportunities for the diabetic foot in a European perspective.

The Diabetic Foot Day Symposium will take place Thursday 15 May 2014, 08.00-17.55.

## Programme

Time	Chair	Topic	Speaker
<b>IWGDF Session: New challenges</b>			
08.00-09.30	Karel Bakker (IWGDF) and Jan Apelqvist (EWMA)	IWGDF and the IDF Consultative Section on the Diabetic Foot, new challenges	Karel Bakker
		The WPR diabetic Foot program	Shigeo Kono
		The "Certified" Diabetic Foot clinic	Stephan Morbach
		The Step-by-Step projects in Africa and its cascade effects	Hanan Gawish
		Discussion	
09.30-10.00	<b>Coffee break</b>		
<b>Status on overall implementation of Diabetic Foot Guidelines in Spain</b>			
10.00-11.00	Javier Aragón Sánchez & José Luis Lázaro	Decreasing Lower Limb Amputation in Spain after implementation of a Diabetic Foot Unit	José Antonio Rubio
		Podiatry's skills and competences in a specialized diabetic foot unit. Towards excellence through specialization	Juan Pedro Sánchez Ríos
		Analysis of the trend of lower extremity amputations in people with diabetes in Spain. Has anything changed in the last 10 years?	Ana López de Andrés
		What relevance does the diabetic foot has in the Diabetes's Strategic Plan of the Ministry of Health within Interregional Health Council?	Agustín Rivero Cudrado (Político de la Ministerio Sanidad)
<b>Diabetic Foot Infections and its impact on limb amputation</b>			
11.15-12.15	Stephan Morbach & Alberto Piaggese	Antimicrobial treatment in a Diabetic Foot perspective – can you prevent infection?	Edgar Peters
		Antibiotics versus Conservative Surgery for treating Diabetic Foot Osteomyelitis	José Luis Lázaro
		Update on the Nordic Diabetic Foot	Klaus Kirketerp-Møller
		Austrian Diabetic Foot project	Gerald Zöch (AWA)
12.15-14.15	<b>Lunch, exhibition and E-Poster sessions</b>		

<b>International Perspectives and Updates</b>			
13.15-14.15	Karel Bakker and Jan Apelqvist	The importance of the IWGDF guidelines in an EU perspective	Karel Bakker (IWGDF)
		Diabetic Foot Problems in Asia	Shigeo Kono (Japan Diabetes Society)
		The American challenges and perspectives	Stephanie Wu (US)
		Implementation on national diabetes programmes and foot care in Latin America. The example of Dominican Republic	Nalini Campillo-Vilorio (Chair of the Dominican Diabetes Association and the Secretary of the Diabetic Foot Latin American Group)
14.30-15.10	Honorary Lecture		
15.10-15.40	<b>Coffee break and E-Poster sessions</b>		
<b>Key Session: The Challenges of Saving the Infected Diabetic Foot</b>			
16.55-17.55	Jan Apelqvist & Javier Aragón Sánchez	Limb salvage surgery for diabetic foot infections. When and how	Javier Aragón-Sánchez
		Double challenge: Charcot foot complicated by osteomyelitis	Luca Dalla Paola
		Ischemia and infection. How can limb salvage can be achieved in a multidisciplinary setting	Alberto Piaggese
		What is the evidence about wound care in patients with diabetes and infected foot ulcers?	William Jeffcoate
